

Ticket A2T6

errors at the start

puppet not working and disk space was at 99%

disk space was max from error logs spamming about puppet being down.

	Load					0.35, 0.36
	Disk Space	CRITICAL	06-10-2026 01:05:18	1d 17h 57m 28s	3/3	DISK CRIT free space 0MiB (0% inode=95%
						USERS 0

and there was a diskbomb that was removed.

#127: TICKET-A2T6: Implement Automated Security Updates Across 4 Servers Using Puppet

all this took place in /etc/puppetlabs/code/environments/production/modules

making /modules/system_update/manifests/init.pp

```
...etlabs/code/environments/production/modules/system_update/manifests/init.pp
class system_update {

    # Ensure log directory exists
    file { ['/var/log/system_updates':
        ensure => directory,
        owner  => 'root',
        group  => 'root',
        mode   => '0755',
    ]

    # Deploy update script
    file { ['/usr/local/bin/system_update.sh':
        ensure => file,
        mode    => '0755',
        source  => 'puppet:///modules/system_update/update.sh',
    ]

    # Cron job (runs daily, script enforces 48h rule)
    cron { 'system_update_job':
        ensure => present,
        user   => 'root',
        minute => '0',
        hour   => '3',
        command => '/usr/local/bin/system_update.sh',
    ]
}
```

and made /modules/system_update/files/update.sh

```
#!/bin/bash

LOG_DIR="/var/log/system_updates"
LOCK_FILE="/var/log/system_updates/last_run.timestamp"
NOW=$(date +%s)
INTERVAL=$((48 * 3600))

mkdir -p "$LOG_DIR"

# Check last run time
if [ -f "$LOCK_FILE" ]; then
    LAST_RUN=$(cat "$LOCK_FILE")
    DIFF=$((NOW - LAST_RUN))

    if [ "$DIFF" -lt "$INTERVAL" ]; then
        echo "$(date): Skipping update (ran less than 48 hours ago)" >>
"$LOG_DIR/skipped.log"
        exit 0
    fi
fi
```

```

    fi
fi

# Run update
echo "$(date): Starting apt-get update" >> "$LOG_DIR/update.log"
apt-get update >> "$LOG_DIR/update.log" 2>&1

# Save timestamp
echo "$NOW" > "$LOCK_FILE"

echo "$(date): Update complete" >> "$LOG_DIR/update.log"

```

applied that to all servers using puppet agent

```
